

Deep Learning

Deep Learning is a subset of Machine Learning that uses Artificial Neural Networks with multiple hidden layers.

Deep Learning can automatically extract features from raw data, making it highly effective for image recognition, speech recognition, and natural language processing.

Common Neural Networks

- Artificial Neural Network (ANN)
- Convolutional Neural Network (CNN)
- Recurrent Neural Network (RNN)
- Transformer Networks

Applications

- Face Recognition
- Speech Recognition
- Chatbots
- Autonomous Vehicles
- Medical Imaging

Advantages

- High Accuracy
- Automatic Feature Extraction
- Handles Large Datasets
